

Corning Cell Counter Bundle

Includes Corning Cell Counter and a Corning Counting Chamber for only \$5,700!

Accurate cell counts in a flash!

For years, the choice between manual and automated cell counting has been a difficult one. Manual cell counting, on the one hand, can be accurate, but time-consuming and very user dependent. Automated cell counting is much faster and less user-dependent, but the cost of disposable counting slides can be an issue. A tough choice, but now there is a solution.

The Corning Cell Counter is the first automated cell counter that combines the best of both worlds.

- Evolving – periodic, seamless upgrades, added features, and improved functionality
- Accurate – thanks to its cloud-based machine learning algorithm
- Improved resolution – most common ability to accurately count as small as 4µm (e.g., PBMC)
- Low-cost – works with common reusable glass hemocytometers
- No consumables required
- Fast – thanks to its online image processing
