COVID-19

Solutions for Diagnostics & Research

Bio-Strategy's team of highly qualified professionals share a passion for science and a strong commitment to our communities.

In partnership with world leading suppliers we provide quality technology solutions including instrumentation, consumables and reagents for all applications related to the fight against COVID-19.

Here are some of our key suppliers making a difference.

Research Solutions for COVID-19

NanoString is committed to advancing scientific understanding of the impact of the coronavirus SARS-CoV-2 on human health worldwide. As many of our current customers shift their work to addressing urgent needs around therapeutic development, vaccines and basic understanding of how the virus works, NanoString will be joining them in this effort together. NanoString is making available to all researchers utilizing nCounter Gene Expression panels and/or Custom CodeSets, a **specific COVID-19 Panel Plus product** that can be spiked-in.

Helping to accelerate research in the fight against Coronavirus

Analytik Jena announced a new application allowing safe reuse of respirator masks in a time of where a lack of supply is detrimental to the healthcare professionals fighting the Coronavirus pandemic. The UVP Crosslinker, a shortwave ultraviolet device, can be used for the disinfection of N95 masks.

Tools for COVID-19 Research

Measure Biomarkers Involved with
Immune Response to Viral Infection

Based on recent reports, patients infected by SARS-CoV-2 show elevated levels of inflammatory cytokines that could lead to cytokine release syndrome or "cytokine storm." MSD offer multiplex assays to measure key biomarkers that are involved in many inflammatory pathways.

Labconco - your partner, supplier and supporter

Are You Involved in COVID-19 (SARS-CoV-2) Research?

With over 40 years of bulk affinity antibody production experience, Bethyl is your trusted partner for anti-Human IgG and IgM antibodies. The following reagents are especially relevant to COVID-19 (SARS-CoV-2) seroconversion assay development:

Human IgM Antibody A80-100A	Human IgM Antibody A80-101A	Human IgG-Fc Fragment Antibody A80-104A
Human IgG-Fc Fragment Antibody A80-105A	Human IgA Antibody A80-102A	Human IgA Antibody A80-103A

Reagents to Support your COVID-19 (SARS-CoV-2) Seroconversion Assay Development

PALL Laboratory

- AcroPak™ capsules are being used for sterile filtration of media used in COVID-19 test kits
- Minimate™ TFF system used in COVID-19 research concentrating viral proteins
- Acrodisc® syringe filters used in QC testing of Chloroquine for COVID-19 research
- Sterile, Acrodisc® syringe filters used for sterile filtration of cell cultures for COVID-19 research
- Nanosep® NAB spin device is being used for RNA extraction of COVID-19 prior to RT-PCR
- AcroPrep™ NAB filter plates and vacuum manifold used in high throughput COVID-19 testing
