## New Supplier!

### Bio-Strategy now supplying BioEcho across Australia

#### BioEcho has a completely new approach for DNA/RNA extraction and analysis

Next Generation kits for DNA/RNA extraction and analysis. Based on the principle of reverse chromatography, the DNA remains untouched, any unwanted sample-derived contaminant is bound and eliminated by the column, potential inhibitory process reagents are not in use and, thus, don't have to be removed.

The result: pure DNA by only one centrifugation step, getting an inhibitor-free PCR template.

#### The complete BioEcho portfolio consists of:

- EchoLUTION DNA extraction kits
- EchoCLEAN DNA cleanup kits
- EchoSAFE buffers and reagents
- ReDUCE Sample concentration
- Lab tools

BioEcho's products are suited for multiple areas of biotechnology, including genomics, transcriptomics, next generation sequencing, biobanking, forensics, pathology, veterinary, food research, as well as industrial, medical and academic research.

## Big Discounts!

### Automated Kjeldahl Analysis

Move away from fully manual processes with these basic Kjeldahl systems that offer partial automation. These digestion and distillation systems increase capacity and throughput, improve safety for your lab, save time, and are cost effective to own and operate.

- Partial automation - free up time for your analysts to do more important tasks with a cost-effective system
- Improve EHS conditions with increased safety from the system design and features

Description	Price	Sale
Gerhardt Kjeldatherm KT 8s - digestion step	\$10,980	\$8,045
Gerhardt Vapodest-300 - distillation step	\$16,257	\$12,900
