Promo Code*:
TissueCell2022

*Valid until September 30, 2022. Also applicable to the EchoLUTION Cell Culture DNA Kits.

The EchoLUTION Tissue DNA Kit Provides:

**Convenience
and speed**

Workflow complete in just 50 minutes due to reduced steps and short lysis time

**High
compatibility**

Suitable for extraction of genomic and mitochondrial DNA from fresh, frozen, and stabilized tissue as well as challenging samples such as adipose tissue or muscle

Reliable results

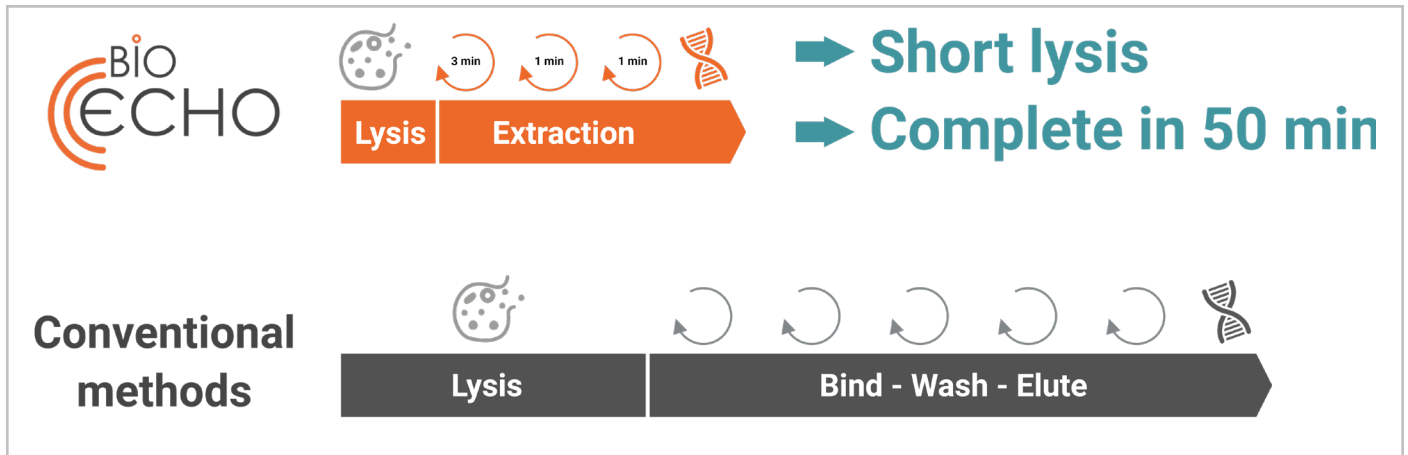

Highly pure and intact DNA free of contaminants and inhibitors perfectly suited for downstream applications

Sustainability

Up to 70% less plastic consumption compared to other extraction methods and no usage of hazardous reagents

The Nucleic Acid Experts.

The Workflow: Faster and Fewer Steps

We used the BioECHO EchoLUTION Tissue DNA and Cell Culture DNA kits for extraction of genomic DNA from cultured cells and from fresh and stabilized human tissue. Both kits impressed with their simplicity, speed and with stable and reproducible yields.
