

Chromatography Chemicals

HPLC separates, identifies and quantifies the components in a sample based on their interaction with the mobile and stationary phases. The solvents used in HPLC must have the right qualities for use as the mobile phase.

Achieve unmatched accuracy and reliability in your separations with these high quality HPLC solvents!

\$114

ACETONITRILE, HPLC GRADE [4L]

Code: CHESLC1005-G4L

\$104

METHANOL, SUPRAGRADIENT HPLC GRADE [4L]

Code: CHESME03064000

\$149

CHLOROFORM (1%EtOH) HPLC [2.5L]

Code: CHESLC1027E-G2.5L

\$139

N-HEXANE 95% HPLC [4L]

Code: CHESLC1083-G4L
