

# MKIII Chloride Analyser

**Only \$11,975**

Usually \$13,674

Code: SHEW92600009

Provides fast determination of salt measurement in the Food and Dairy Industry

- Measurement Range:  
10 – 999mg/l or 2 – 165mg% Salt
- Automatic endpoint detection system using coulometric titration
- Fast – results in less than 40 seconds! (to 200mg/l)
- Ability to read salt concentration directly

Optional Active Salt Software (requires PC and balance with RS232) eliminates transcription errors with no need to achieve specific sample and diluent weights.

Salt measurement (Sodium Chloride) in the Food and Dairy Industry is universal. The ability to read directly, Salt concentration, and the automatic endpoint detection system have made the 926 the instrument of choice for food manufacturers and analysts throughout the world.

Salt and salinity also represent serious contamination in many industrial processes. The sensitivity of the coulometric method enables ppm range measurement in boiler feed water, polymer washes, borehole slurries, as well as soil salinity studies. Reading in ppm (mg/l) Chloride, the Select Button offers the immediate conversion of Chloride content into mg% Salt (Sodium Chloride) of the original sample

Supplied complete with: M926 Chloride Analyser, Printer Cable 9 way RS232, Buffer (500ml), 200mg/l Chloride Standard Solution (100ml), 1 Pack of Anodes, 1 Pack of Electrodes, 2 Marked Beakers, Silver Electrode Polish, Stirrer, Operator Manual, Universal Mains Adapter, and USB lead A(M) – B(M)

Clinical version (M926S) also available.

Contact us for more details.

Valid Until: 28 Feb 2026

Ref. Code: SHEW-MKIII
