

SARS-CoV-2 Research Solutions

When working in SARS-CoV-2-research and vaccine development, reliable results are important. At Eppendorf they want to help you to optimize your results by providing the right equipment and tools.

Now more than ever, it is important to understand the nature of your samples and the likelihood of those samples posing a risk not only to other samples but also to the scientists who are handling them and the wider laboratory.

That scientist is you!

Eppendorf has products designed to speed up results and to protect you:

- Eppendorf centrifuges offer innovative safety features including fixed-angle and swing-bucket rotors with verified aerosol-tightness.
- Eppendorf range of manual pipettes and tips provides ergonomic, safe and accurate liquid handling tools.
- Eppendorf have a full range of other consumables that can be used.

In addition, Eppendorf has a variety of articles and downloadable tools that help you and your laboratory colleagues learn how to work safer to minimize the risk of aerosol contamination in the laboratory.
