

Air instead of water.

Findenser™

Safety for your laboratory

The Findenser™ is a high performance condenser and replaces the need for water-cooled condensers in over 95% of all common chemistry applications. The finned aluminium jacket provides excellent heat transfer.

Leading Safety Standards

No risk of water leaks and flooding from running water – unattended and continuous use

Superior Ease of Use

Easy to set up, no tubing required – more space in your laboratory

Reduced Cost of Ownership

No water usage – economical and resource-friendly solution

- Immediate use
- Absolutely flexible – no water connection required
- Large cooling surface
- No running costs
- No difference in performance to conventional reflux condensers

 **heidolph**
research made easy

Air instead of water.

The greener alternative

Finned aluminium jacket

Excellent thermal conductivity with high performance air cooling and chemical resistant anodised surface

Easy clamping

Use with standard laboratory clamps or Findenser™ attachment kit

Ground glass cone / socket

Accepts standard tapered cones / sockets and choice of sizes

Patented design

Sealed assembly with encapsulated thermo-fluid for maximised thermal conductivity and heat transfer

Prismatic Design

Contoured edges prevent rolling when not in use, minimises damage to aluminium fins
