

GE Vivaspin™ Protein Concentrator Spin Columns

Top quality products on sale, order today!

Vivaspin™ spin columns are designed for fast, nondenaturing concentration of biological samples by membrane ultrafiltration.

- High recovery rates – up to 30-fold concentration of the sample can be achieved, with recovery of the target molecule typically exceeding 95%
- Sample protection – the patented Vivaspin dead-stop technology ensures samples cannot be concentrated to dryness and enables direct concentrate recovery
- Ease-of-use – one-step sample concentration in a single tube, for minimal sample handling and reduced sample loss
- pH compatibility – for a broad range of pH 1 to 9
- High flow rates – and minimal membrane blockage through the vertical polyethersulfone (PES) membrane design
- Minimal protein adsorption – thanks to the Vivaspin polycarbonate tube design
