

Cytiva Western Blotting Products

VALID UNTIL:
31 December 2020

Ref. Code:
GEHE-WEST

Western Blotting Detection

Amersham ECL Western Blotting Detection Reagents.

A variety of reagents, with wide choice depending on the aim of the experiment.

- Detection of high to medium abundant proteins: Amersham ECL start. NEW! 18 month shelf life
- Reliable detection of high to medium abundant proteins: Amersham ECL
- Quantitative analysis of high to low abundant proteins: Amersham ECL Prime

Western Blotting Membranes

Amersham Protran Nitrocellulose (NC) and Hybond (PVDF) Blotting Membranes.

Excellent membranes in a selection of rolls, sheets, and sandwiches.

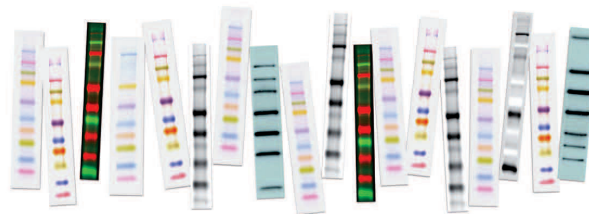

- Broad selection
- Pore sizes ranging from 0.1 to 0.45µm to suit your application requirements

Amersham ECL Molecular Weight Markers

Accurate size determination of your protein on gels and blots.

- Ready-to-load markers with sharp, intense bands on gels and blots enable monitoring of electrophoresis progress and convenient confirmation of transfer to blotting membranes.
- Comprises of 10 individually coloured proteins in the molecular weight range of 12,000 to 225,000.
